RE: Support for the *Pharmacy and Medically Underserved Areas Enhancement Act*

Dear Senators Grassley, Casey, and Brown, Representatives Butterfield and McKinley:

The undersigned organizations thank you for your leadership and applaud the introduction of the *Pharmacy and Medically Underserved Areas Enhancement Act* (H.R. 2759/S.1362). Your legislation will ensure that Medicare beneficiaries, our nation's seniors, and Americans in underserved areas are no longer denied access to healthcare services available from pharmacists.

States are increasingly recognizing the ability of pharmacists to improve access to services like point-of-care testing, access to urgently needed medications such as pre-and post-exposure prophylaxis for HIV, management of complex medication regimens, and smoking cessation services. This has never been truer than during our current public health emergency, when states are asking pharmacists to provide a range of important services including COVID-19 testing, and vaccinations against COVID-19 and other diseases. In rural and underserved communities, pharmacists may be the only accessible healthcare provider.

Despite state laws allowing patients to access healthcare services from their pharmacist, Medicare Part B does not cover these services when they are provided to Medicare beneficiaries. As a result, beneficiaries' access to the healthcare provider with the most medication-related education and training is severely restricted. Your bill would increase the health of patients and correct this restriction on access to care for Medicare beneficiaries.

The bill does not expand pharmacists' scope of practice in any state. Rather, it allows pharmacists to provide Medicare beneficiaries with the same level of care that they are licensed to provide to other patients.

We thank you for your leadership on ensuring Medicare beneficiaries have access to pharmacist services and the introduction of the *Pharmacy and Medically Underserved Areas Enhancement Act*. We look forward to supporting your efforts to advance this important legislation to improve access to care for our nation's Medicare beneficiaries.

Sincerely,
