completely and comprehensively separate beta lactams from non beta-lactam products.

- I was unable to compound the suspension from commercially available tablets/capsules because my pharmacy cannot comply with FDA's insanitary conditions guidance requirement to completely and comprehensively separate beta lactams from non beta-lactam products.
- I provided the solid dosage form to the patient with instructions on how they could make it into an oral liquid.
- I compounded the suspension from commercially available tablets/capsules because my pharmacy can adhere to FDA's insanitary conditions guidance requirement to completely and co...

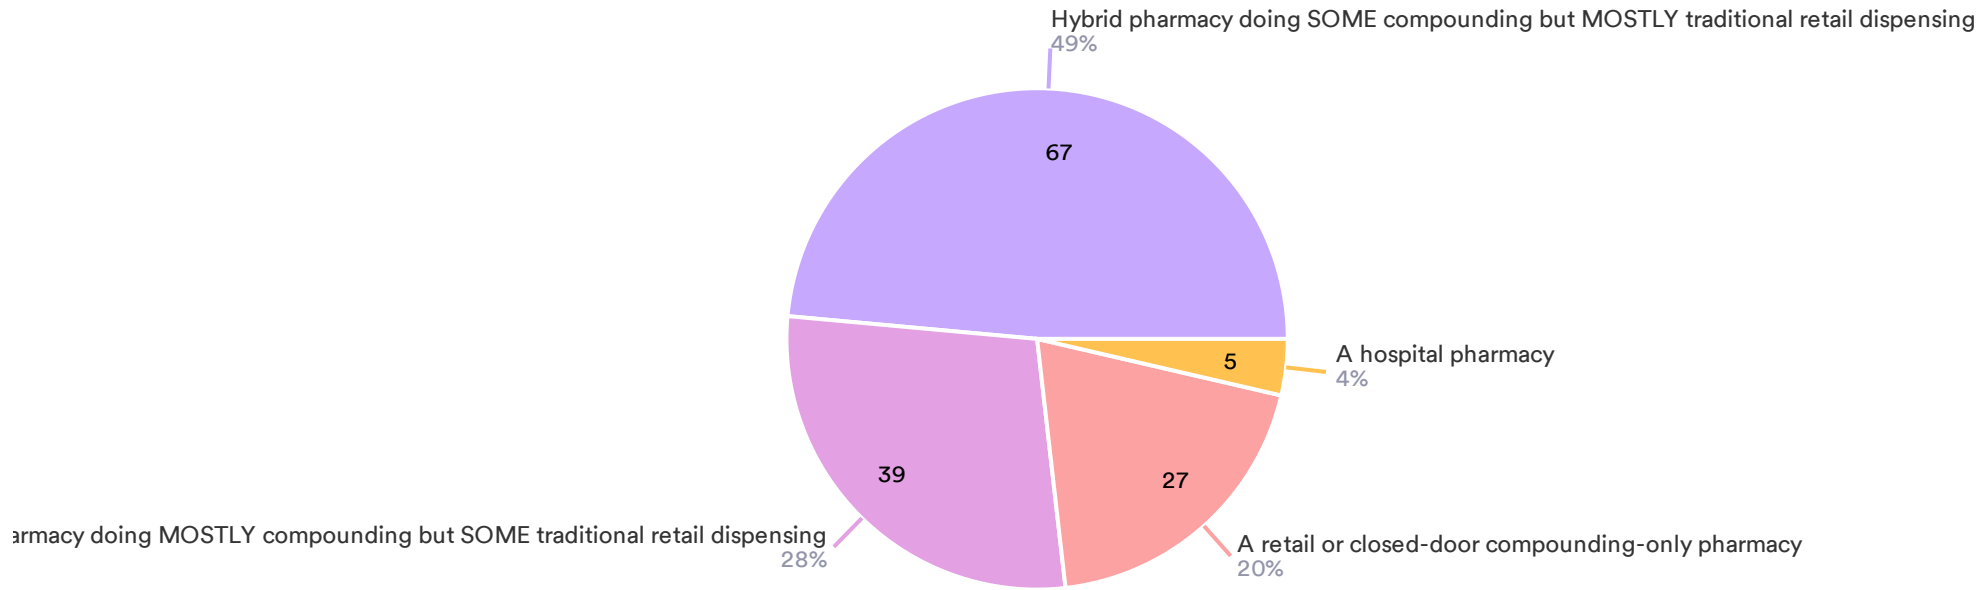

In the past six weeks, have you experienced or are you beginning to experience shortages of cephalexin suspension or other antibiotic alternatives to amoxicillin suspension?
