

Current State of Outcomes

Philip Smyth

1

Enrollment

- **21 Pharmacies** have enrolled under the APC OutcomeMD program

But

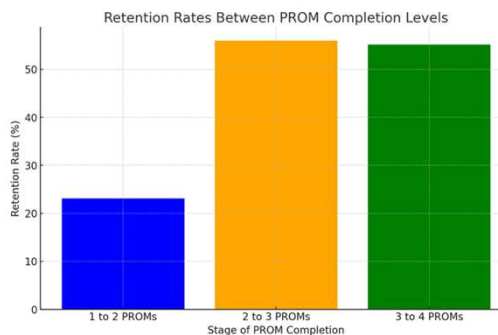

- **Only 8 Pharmacies** have sent >100 assessments

2

Surveys Completed

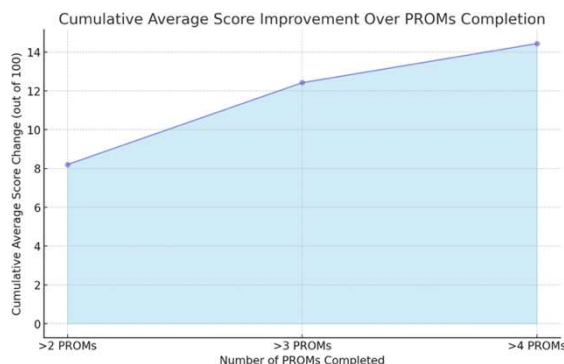

- **6114** patients completed ≥ 1 PROM
- **1410** patients completed ≥ 2 PROMs
- **789** patients completed ≥ 3 PROMs
- **435** patients completed ≥ 4 PROMs

3

Outcomes Sample- APC Female Assessment

Number of Patients of completed >2 PROMs	384
Average score change in symptom (out of 100)	8.206
Average % change in symptom	21.16%
Number of Patients of completed >3 PROMs	255
Average score change in symptom (out of 100)	4.218
Average % change in symptom	14.69%
Number of Patients of completed >4 PROMs	163
Average score change in symptom (out of 100)	2.015
Average % change in symptom	10.67%

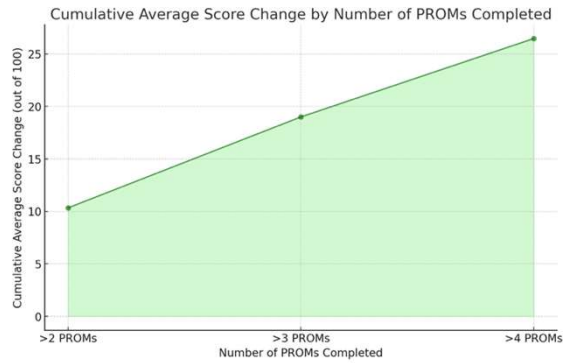

4

Outcomes Sample- APC Male Assessment

Number of Patients of completed >2 PROMs	28
Average score change in symptom (out of 100)	10.341
Average % change in symptom	26.50%

Number of Patients of completed >3 PROMs	20
Average score change in symptom (out of 100)	8.663
Average % change in symptom	15.50%

Number of Patients of completed >4 PROMs	9
Average score change in symptom (out of 100)	7.466
Average % change in symptom	18.80%

5

Challenges

- Data Analysis → Exploring tools-programs? AI?
- Patient completion rates → Incentive programs, better onboarding, value add, define endpoint?
- Utilization by current enrolled pharmacies → Enhanced workflow
- Enrolling additional pharmacies → Better identify and explore value proposition
- Linking outcomes to specific therapies → Automate the capture of data

6

Challenges

Data Analysis	➔	Exploring tools-programs? AI?
Patient completion rates	➔	Incentive programs, better onboarding, value add, define endpoint?
Utilization by current enrolled pharmacies	➔	Enhanced workflow
Enrolling additional pharmacies	➔	Better identify and explore value proposition
Linking outcomes to specific therapies	➔	Automate the capture of data

7

Challenges

SOFTWARE INTEGRATION
